PROJECT PROFILE:

1. SMS (SCHOOL MANAGEMENT SYSTEM)

Client: Seth MR Jaipuria School Lucknow
Environment: C# and Crystal Report
Database: MS-SQL Server 2008
Responsibilities: Involved in Database Developer, coding and Designing, bug fixing, Developed database code objects such as stored procedures, views, functions etc. Write Scripts for data accessing and modification.
Description: SMS (School Management System) is a large database system which can be used for managing your school's day to day business. School Management System allows users to store almost all of their school's information electronically, including information on students, employees, properties, teaching materials etc. Most importantly, this information can be easily shared with authorized users, records can be easily searched, and reports can be easily generated.SMS is configurable and can be configured to meet most individual school's needs. It is a multi-user system and can be used by hundreds or even thousands users at same time.
Scope of this package includes Exam Module, Library Module, Registration Module, Receipt Module and Admin Module.

2. IMS (INSURANCE MANAGEMENT SYSTEM)

Client: Welfare Insurance Services (A Unit Of: Sai Welfare Multi Services Pvt. Ltd.)
Environment: C# and Crystal Report
Database: MS-SQL Server 2008
Responsibilities: Involved in Database Developer, coding and Designing, bug fixing, Developed database code objects such as stored procedures, views, functions etc. Write Scripts for data accessing and modification.
Description: IMS (Insurance Management System) is an LAN based window application, which is designed to make application work of insurance policies easier and flexible. This application is used within their organization under the distributed accessibility to check the status of the customers who have taken new policies and their proper track and reminding of policy premium payments. The system is actually developed to cater to the process speed up in their Business process such that the customer satisfaction rates increase and the generic flow of customers into this domain follows a smooth and steady fashion. The major problem under the manual process is to keep track of the existing insurance policy holders, and remaining them at regular intervals about their policy premium payments. In order to render the ordinary services also it takes a great lot of time in just searching through the registers for the existing customer.
Scope of this package includes Receipt Module, Report Module and Admin Module.

3. CRM (CUSTOMER RELATIONSHIP MANAGEMENT)

Client: Welfare Insurance Services (A Unit Of: Sai Welfare Multi Services Pvt. Ltd.)
Environment: C# and Crystal Report
Database: MS-SQL Server 2008
Responsibilities: Involved in Database Developer, coding and Designing, bug fixing, Developed database code objects such as stored procedures, views, functions etc. Write Scripts for data accessing and modification.
Description: CRM (Customer Relationship Management) is an information industry term for methodologies, software, and usually Internet capabilities that help an enterprise manage customer relationships in an organized way. For example, an enterprise might build a database about its customers that described relationships in sufficient detail so that management, salespeople, people providing service, and perhaps the customer directly could access information, match customer needs with product plans and offerings, remind customers of service requirements, know what other products a customer had purchased, and so forth.

4. Billing Software

Client: Sai Business Point, Bihar.
Environment: C# and Crystal Report
Database: MS-SQL Server 2008
Responsibilities: Involved in Database Developer, coding and Designing, bug fixing, Developed database code objects such as stored procedures, views, functions etc. Write Scripts for data accessing and modification.
Description: Billing Software can quickly become overwhelmed with multiple revenue streams, one-off and recurring revenue, customized payment terms and project-based billing. The result is often billing errors, wasted effort, revenue recognition issues and even customer attrition. This software turns billing management process into a competitive asset by integrating it completely into business. Thanks to its seamless quote-to-order-to-bill process and centralized customer data, Billing Software maximizes cash flow. It can be adapted by company's specific needs, helping to reduce billing errors and improve customer satisfaction. Real-time dashboards and detailed visibility into customers and invoices allow staying focused on managing receivables.
Scope of this package includes Receipt Module, Invoice Module, Search Module, Report Module and Admin Module.
